

CaseBridge

One interview. Five applications. Zero data leaks.

CPP AI Hackathon 2026

casebridge.live

Team Lebrancos

The Problem

60–70%

of a social worker's time goes to paperwork

What they do now:

- ▶ 45-min intake per client
- ▶ Check 5+ program eligibilities manually
- ▶ Fill each application form by hand
- ▶ Repeat 15–20 times per day

What it costs:

- ▶ 15+ hours/week on admin alone
- ▶ Eligible families miss programs
- ▶ Clients wait weeks for benefits
- ▶ 40% annual caseworker turnover

CaseBridge: AI Co-Pilot for Social Workers

One conversation in → Five filled applications out

Six agents, one pipeline:

Intake	Conversational interview
Profile	Normalize & validate
Risk	Red/amber safety flags
Research	Match programs
Eligibility	Deterministic rules
Packet	Pre-filled PDFs

What makes it different:

100% local AI — Gemma 4 on your GPU
No data leaves the machine. Ever.

140+ languages — auto-detected
Type in Spanish, Vietnamese, Farsi. . .

Deterministic eligibility
Auditable rules, not LLM guesses

Real application PDFs
AcroForm templates for 5 CA programs

Live Demo

casebridge.live

New Case → Intake → Profile → Eligibility → Packet

Intake

Empathetic, one question
at a time, any language

Eligibility

5 programs, deterministic
rules, clear reasons

Packet

Pre-filled PDFs, caseworker
reviews before submission

Privacy by Architecture

No cloud AI
No API keys
No telemetry

- ✓ Data in memory only — no database
- ✓ Destroyed on restart — no persistence
- ✓ CSP header blocks external AI calls
- ✓ Zero cloud AI imports in codebase

- ✓ Works fully offline (verified)
- ✓ HIPAA-ready architecture by default
- ✓ Eligibility is deterministic & auditable
- ✓ Caseworker reviews before submission

Impact

Tech Stack & Roadmap

Built with:

AI	Gemma 4 E4B / Ollama
Front	React 19, Vite, Tailwind
Back	FastAPI, Pydantic
Rules	json-logic (deterministic)
PDF	pdf-lib, reportlab, pypdf
Deploy	SSH tunnel to VPS

Accuracy:

- ✓ Eligibility: **deterministic**, 0% variance
- ✓ Extraction: LLM + **caseworker review**
- ✓ Rules from public FPL schedules
- ✓ Git-versioned, auditable JSON

Deployment roadmap:

- Phase 1** Pilot: 1 LA County DSS office
5 caseworkers, 3 months
- Phase 2** Scale: 5 California counties
State-specific rule sets
- Phase 3** CDSS state-wide partnership
BAA-covered infrastructure
- Phase 4** Open-source rules engine
Other states bring their own rules
