The Problem

60–70%

of a social worker's time goes to paperwork

What happens today:

- ▶ 45-min intake per client
- ▶ Check 5+ programs manually
- ▶ Fill each form by hand
- ▶ Repeat 15–20 times per day

What it costs:

- ▶ 15+ hours/week on admin alone
- ▶ Eligible families miss programs
- ▶ Clients wait weeks for help
- ▶ 40% annual caseworker turnover

What CaseBridge Does

THE WORKFLOW

Conversation

Eligibility Check

Filled Applications

1

Interview

Caseworker describes the client's situation. AI asks smart follow-ups — one field at a time.

2

Screen

Checks eligibility using consistent rules. Same input always gives the same answer.

3

Generate

Produces filled application PDFs for every qualifying program. Print and submit.

140+ languages · Runs **entirely on your computer** · **Unlimited programs** (5 in demo)

Live Demo

casebridge.live

New Case → **Interview** → **Review** → **Eligibility** → **Applications**

AI asks the right questions

Walks through 15 fields
one at a time, naturally

Eligibility with reasons

Clear pass/fail for each
program, not a black box

Real filled PDFs

Government-style forms
with client data populated

Open-source license
No API costs
No vendor lock-in

No data goes to Google, OpenAI, or anyone else. Ever.

✓ Data in memory only ✓ Works fully of-
fline (verified) ✓ HIPAA-ready architecture

Privacy by Architecture

**No cloud AI
No API keys
No telemetry**

- ✓ All data stays on your computer
- ✓ Nothing saved — destroyed on restart
- ✓ Browser blocked from calling external AI
- ✓ Zero cloud AI code in the entire project

- ✓ Works fully offline (verified)
- ✓ HIPAA-ready architecture by default
- ✓ Eligibility rules are consistent & auditable
- ✓ Caseworker reviews everything before submission

Impact

SDG 3 Health

SDG 10 Equality

SDG 11 Communities

Why CaseBridge Wins

Others do one thing. **CaseBridge** does all three — and runs locally.

	AI Interview	Eligibility	Filled PDFs	Runs Locally
mRelief (OpenAI)	✓ SNAP only	✓ SNAP only	—	—
Single Stop	—	✓	—	—
findhelp	—	—	—	—
Eleos / Freed AI	✓ clinical notes	—	—	—
Apricot / CaseWorthy	—	—	—	—
CaseBridge	✓ unlimited	✓ unlimited	✓	✓

Expandable: 5 programs in today's demo. Adding a new program = one rule file, no code change. **Any state, any number of programs.**

Why now: Gemma 4 (April 2026) — first local model fast enough for real-time conversation.

Our moat: Only offline AI in this space. State-specific rules are hard to replicate.

Market & Next Steps

The opportunity:

700,000 social workers in the US

3,100 county human services offices

25,000+ nonprofit benefits navigators

Business model:

Price \$50 / caseworker / month

Savings \$375 / week in labor saved

ROI **7.5x return** for the agency

Adopt Free 3-month pilot

BDT + Nava: \$3M (Gates/Google.org) to *explore* this.

We already built it.

Deployment roadmap:

Phase 1 Pilot: 1 LA County DSS office
5 caseworkers, 3 months

Phase 2 Scale: 5 California counties
County-specific program rules

Phase 3 CDSS state-wide partnership

Phase 4 Open-source rules engine
